

Assessor

- There are 4 (SCAR) Small claims assessment review filings this year. All from the “tax abatement” company in Long Island. All claimed a Full market of only \$1,000 on their grievance applications. The Assessor will prepare for these and attend the hearings.
- We have started working on the 2024 Roll. Continuing to update inventory, sales, permits, etc.
- The Assessor has filed with the state for advisory appraisals on the Utility properties. This is part of the Reassessment process.
- The 2023 Tax maps are printed and available. Our website and the County Website have been updated with the links.
- Assessor and Assessor clerk will be out in the field verifying inventory and taking new photos of all parcels. This keeps us in compliance for STATE aid for the reassessment and keeps our files current.
- Reassessment - the assessor has been working with the Contractor on data for analysis. The first step is creating land tables. We are in that process. Once ready, they will be tested against both sales and subjects.
- Due to the assessment “update” on the 2023 Roll, the State has recalculated the residential assessment ratio. This is the ratio of the sales amount’s vs the actual assessments. The Ratio was at 75.43 percent prior to assessment updates. Now we are confirmed at 90.36 percent. This is only a portion of data used to create the Equalization rate. The final equalization rate is 90%. There was also a need for the state to calculate a “special” equalization rate for certain purposes. The special rates effect the value of a few items including the veterans and agricultural exemptions.

Business & Economic Development

Working with the CAC and Brendon Becker of Lamont Engineers, we submitted our CFA for municipal water and wastewater studies.

CAC, Climate Smart & Environmental Management

CAC: WATER TESTING/DWSPP2

The CAC has completed the first part of the Town's 2023 water testing on the Rtes. 20/22 business corridor, and those results were included in the grant for the Wastewater feasibility study. The grant application was submitted at the end of July. Of 15 wells tested, results yielded a 50% positive rate for coliform, and 20% for e coli. Everyone has been contacted and are shocking their wells OR are

already not drinking their water and have been aware for some time that their water is considered non-potable. We are exploring what is next for this area and are consulting with the NYSDOH team (the same folks who tested our water a few years ago for their pilot state-wide well testing program). The next phase of water testing planned will be town wide water testing. We will be reaching out to residents. Folks are responding to the offer of free testing that has been posted in the past several Town newsletters. We are continuing to look at sampling wells in the 5 different substrates (sources of water) and will choose representative wells in each location. The CAC, with the NY Rural Water Association, is working on an implementation plan for the Drinking Water Protection Plan (DWSP2) for the DEC. Getting DEC approval will enable us to go for grants to continue water testing and to continue to protect our water sources. When we have a close-to-final draft we will submit the Implementation Plan to the Town Board, which we hope will be in September. This plan includes education and outreach which will be important to continue to educate people about keeping their, and all of our, drinking water safe. It is clear there is a major issue with potable water in the business corridor and we are eager to talk to the Town Board about what the town could be doing, and some near-term solutions.

TREES FOR TRIBS

Trees and shrubs are in good shape, nature has been kind with rain. New signage for the project is up in two locations, on the bridge at Rt. 22 entrance and on the men's bathroom entrance across from tennis courts. Some tubes were removed from some of the trees and shrubs. The CAC continues to monitor the progress of growth. Due to the recent rains and beaver dam flood, severe erosion is noted in the stream, further undercutting the banks on both sides

CSC: Update to Town Board Aug 8, 2023

The CSC is pleased to report that all 50 solar panels are up on the Town Hall roofs. Although they have been tested and generate electricity, we must wait until NYSEG comes to install a new meter in the next few weeks before turning them on. As reported in the past, they are projected to generate 22,315.00 kWh of electricity every year offsetting 89% of the annual usage of both the Town Hall and the Garage. Grant money from NYSERDA funded the entire cost. The Battery recycling program, which has collection boxes in 6 locations in town, has to date, recycled 821 lbs of batteries. Our newly initiated plastic recycling program has taken in 89lbs from residents in three months. We remind everyone to please only deposit clean plastic in the container in Town Hall. Bike racks are being set up at the ball park fields, the Pavilion, Town Hall and soon behind Berkshire Bank. CSC advisor, Marc Anthonisen and associate Morgan Brenner completed an assessment of the need for a level 3 EV charger in New Lebanon, in addition to the existing level 2 charger. Columbia County has been looking for locations and identified New Lebanon as a prime location based on the volume of traffic coming through here. The report suggests that for various reasons it doesn't make sense to pursue a level 3 fast charger at this stage and instead promotes the placement of one at Love's where drivers are entering and exiting 90. Apparently, a level 3 charger is coming soon to the

Shell station on Rt 20 in Pittsfield. Conversations continue with Assemblywoman Didi Barrett's office for a grant to cover the cost of a Water Tank for the new LVPA fire house.

Our compost team continues to pick up coffee grinds and food scraps from restaurants in town that will end up in the county digester at the Greenport transfer station.

The CSC participated in the Aug 6 Think Globally Act Locally event at Shaker Mill Inn which was a big success.

Seniors

The Office of the Aging is developing a survey for all Seniors in the County to see what the needs are. The survey will then be tabulated by town and the results shared with the Town to see what needs we have that are not being met. The State continues to collect data about the needs of Seniors in New York and will develop a plan from that information for the future. Office of the Aging continues to offer programs for Seniors for socialization. Senior centers continue to have lunch, programs and trips depending on the center. Coupons are available for the Farmers Market by contacting the Office of the Aging.

Traffic Safety

In addition to the written report below, please see graphs at the end of this document. The State will start repaving Route 20 eastbound at the end of August weather permitting, the work should be completed by the end of October.

The DWI coordinator for Columbia County spoke with the students and their parents after the students were arrested for on a DWI/ speeding ticket in town two weeks ago.

Attached are the reports from the traffic speed sign for July. The sign was moved to in front of the West Lebanon Post Office. I gave the June reports from the sign to the State Police and the County Sheriff's office, and I asked if they would review them and adjust patrols to help reduce the number of speeders in this area.
