RE: Estimate to decommission test well

Dear Ms. Houghtling:

The cost to decommission the test well at Shatford Park property is \$2,500. This includes pressure grouting well with bentonite slurry, per NYS DEC standards.

Optionally, the cost to cut at grade and install well seal to stop the flowing water, would be \$500. Please note that in the future, NYSDEC may require you to plug this well in the future.

Thank you for allowing our firm the opportunity to provide you with this cost estimate.

Please let us know if you wish to proceed with the work, so we can order the necessary materials and schedule the work to be performed.

Sincerely,

Tyler J. Wills
